

FOOTPATH PLANTER TYPE B:

DESCRIPTION:

Tree or palm planting pits on paved areas and footpaths where there is no building overhang or where the overhead awning is at a distance greater than 2 metres from the outside face of the kerb (thus allowing growth and spread of tree/ palm canopy.)

DIMENSIONS:

Internal dimensions of planting pit:
1250 x 1250mm

MATERIALS:

Footpath planters shall use pavers for the header course which match surrounding paving type as required by the Chief Executive Officer.

CONSTRUCTION:

The planter shall be constructed as specified in the detail opposite. Special attention should be given to the concrete footing beneath the header course, which should finish flush with the inside edge of pavers.

PLANTING:

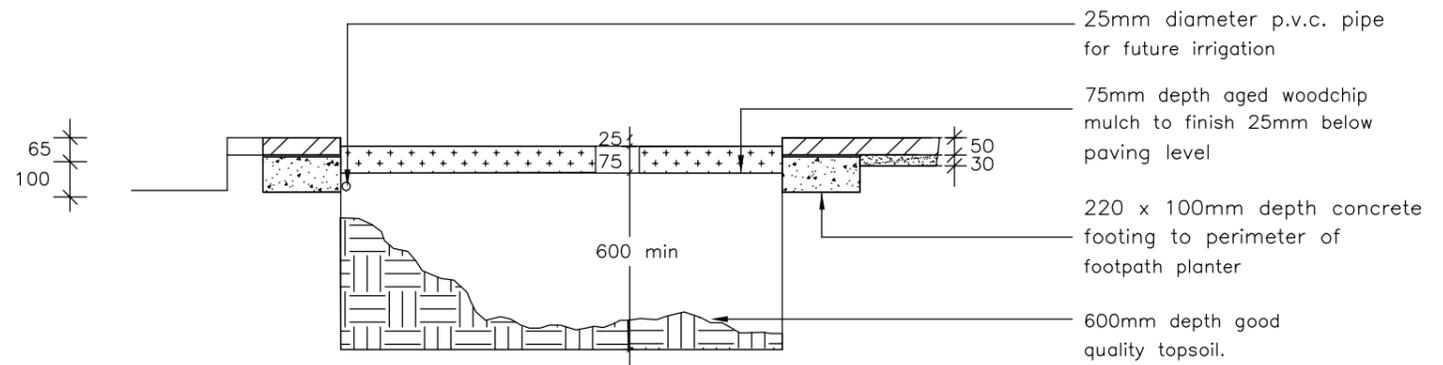

Species to be nominated by Cairns City Council. Minimum pot size shall be 100 litres. When planting, the existing soil line within the container should finish at a level 100mm below the adjacent paving level.

REQUIREMENTS:

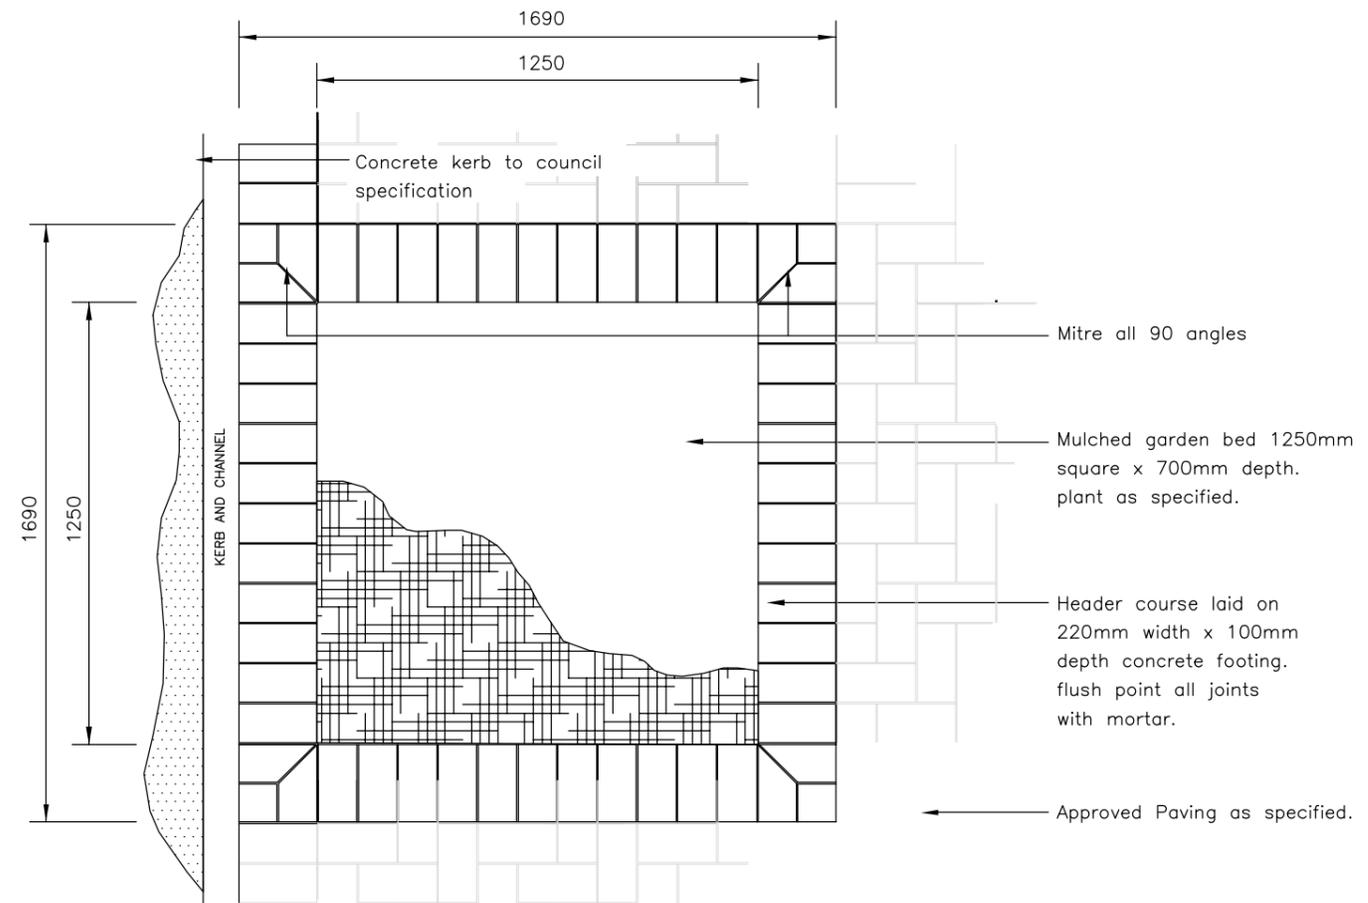

Standard footpath planters shall be located at 6 metre centres along the length of the footpath. Where other structures or street furniture are located so as to obstruct the the siting of a footpath planter at the required location, the structure or street furniture where possible, shall be relocated clear of the site of the footpath planter.

IRRIGATION:

If more than one planter is to be installed, the planters should be linked with a 25mm P.V.C. conduit laid within the planter as close to the kerb as possible
